Web App Course Project:

Team Name: The Mongolian Tribe
Member List:
Tom Liao
John Burke
Charlie Fox

App summary:

Our app is a music charts website that will pull chart data from Spotify, iTunes, and other music service's APIs and consolidate and store it in MongoDB. Charts can be viewed by country and historic charts can be pulled from the database. Songs can also be searched to view their charting history and charts can be sorted to determine which songs are rising the fastest week over week.
